

BSC Services Provided to BST at FDC

Transaction-Based
Services

Knowledge-Based
Services

Security (Cont'd)

- Pre-employment background checks and contractor/vendor background checks for BSC and BSE subsidiaries. X
- Administration of the Fidelity Bond Program for BSC. X
- Administration of the Department of Defense Industrial Security Program for BSC. X

Strategic Planning & Corporate Development

- Coordination and oversight of BSC strategic analysis and planning, focusing on all aspects of communications and technology convergence. X
- Facilitation and development of integrated vision/strategy for BSC residential consumer market. X
- Facilitation and development of integrated vision/strategy for BSC business consumer market. X
- Coordination and facilitation of BSC corporate development activities, including mergers and acquisition (Not allocated to BST). X
- Support of various BSC planning committees and executive management. X
- Maintenance and development of "Corporate Resource Center" X

Tax

- Tax planning across tax jurisdictions (federal, state, local) and types of taxes (income, property and other). X
- Tax preparation for income(federal and state), property, sales and use, and other tax returns and business and occupational licenses. X
- Preparation of consolidated income tax data for financial statements. X
- Research and review of current and proposed tax-related legislation. X
- Explanation and data request coordination related to annual IRS federal income tax audits. X

Treasury

Treasury Methods

- Operating procedures, methods and management information systems for the Treasury Department. X
- Centralized planning and analyses of methods, procedures and management information systems needed in the Treasury Departments of various BellSouth companies. X
- Monitoring of the implementation and adherence to accepted Treasury procedures. X

BSC Services Provided to BST at FDC

Transaction-Based
Services

Knowledge-Based
Services

Treasury

Treasury Methods (Cont'd)

- Special studies of new Treasury concepts and procedures. X
- Various administrative duties such as budgeting, force and space planning, etc. X

Cash Management

- Coordination of financial activities between BellSouth, Chemical Bank (agent for shareholder account services and registrar), and AmSouth Bank (dividend paying bank). X
- Coordination of the banking relations activities for the company including evaluating and recommending banks for various services. X
- Receipt and deposit of all BellSouth receipts. X
- Disbursement of company funds via check, wire transfer, electronic funds transfer, and pre-authorized transfers. X
- Maintenance of the company's cash books, bank registers and check registers and journal accounts. X
- Management of the Company's temporary cash investments (Pool of Funds). X
- Cash forecasts and all short-term borrowing to cover the Company's cash needs. X
- Short-term loans (advances) to subsidiaries to meet their cash requirements. X
- Short-term pension fund investment. X

Financing

- Financial objectives for the parent company and assistance to the subsidiaries in the development of their objectives. X
- Support of subsidiaries in developing financing plans. X
- Coordination of rating agency interface for BellSouth and its subsidiaries. X
- Planning and coordination of BellSouth debt and equity financings. X
- Research into new and innovative financial techniques and capital markets. X

Trust Management

- Fiduciary direction and financial administration for the BellSouth Rabbi trust for non-employee Directors, BellSouth Rabbi Trust for Executive/Key Managers, BellSouth Corporation STAP Trust and the BellSouth Corporation Payroll Employee Stock Ownership Plan (PAYSOP) Trust through oversight of Trustee and Recordkeeper activities, monitoring disbursements from the Trust and ensuring Trustee contractual arrangements are met, and providing reports required by the Internal Revenue Service and reporting to the Finance Committee of the Board of Directors. X

BSC Services Provided to BST at FDC

Transaction-Based
Services

Knowledge-Based
Services

Treasury

Trust Management (Cont'd)

- Fiduciary direction and financial administration for the BellSouth Foundation through oversight of Custodian activities, monitoring disbursements from the Fund and ensuring Custodian contractual arrangements are met, providing investment planning, analyzing investment vehicles and selecting an investment strategy to meet cash flow requirements for higher grant payout level, developing and evaluating performance of current investment managers, monitoring adherence to investment guidelines and holding formal investment manager reviews, and reporting to the Finance Committee of the Board of Directors. X
- Fiduciary direction and financial administration for the BellSouth Vail Trust through in-house recordkeeping, payment of awards and associated expenses, developing financial reporting, and reporting to the Finance Committee of the Board of Directors. X
- Coordination with Comptrollers, Benefits, Legal and Tax Departments on the development and implementation of Corporate strategies on employee benefits issues through the legislative resources provided by the BellSouth D.C. Governmental Affairs group. X

Investor Relations

- Financial and statistical information for institutional investors, security analysts, and investment advisors about matters affecting earnings, stock price, or investment outlook. X
- Articulation of key corporate issues to the financial community via telephone, printed media, personal contacts, and seminars. X
- Organization of meetings of BellSouth financial officers with financial societies and key analysts. X
- Seminars, tours of facilities, and continuing communications via mail to over 1,500 interested financial community members. X
- Information to top management and Board of Directors on investor attitudes, market conditions, and trends in the stock market. X
- Analysis of patterns, trends, composition, and characteristics of the shareowner base to assist in managing shareholder decisions. X
- Coordination of investor relations activities with the Public Relations Department to ensure the accurate, timely, and consistent release of information. X
- Maintenance of good relations with both current and potential investors by promptly responding to individual and institutional investor requests for information and providing a continuous flow of information to the financial community. X

Cost Impact of EFMV

Cost Estimate Methodology

TB&A has estimated the cost impact of the use of EFMV to BST and its affiliates, for the recurring costs associated with the compliance to the NPRM, using the following steps:

- 1) Interview BST and affiliate personnel regarding the services provided.
- 2) Review BST and affiliate documents including the Cost Allocation Manual
- 3) Identify services provided to BST from affiliates
- 4) Classify services (transaction-based or knowledge-based)
- 5) Develop assumptions (frequency of testing, rate per hour for labor, use of outside consulting, grouping of services)
- 6) Determine cost per test for each service classification
- 7) Calculate number of equivalent EFMV tests
- 8) Multiply number of each type of EFMV test against its estimated cost
- 9) Calculate total cost

The cost estimate does not include costs from vendors to provide quotes or those costs not currently possible to quantify, such as the economic costs associated with item "d" in the "Recurring Compliance Costs" section of this Attachment. In addition, the cost impact of the implementation of the EFMV pricing rule requirements, and the cost of testing the services provided from BST to its affiliates at FDC, has not been estimated and would increase significantly the total cost impact to BST and its affiliates.

Assumptions

- EFMV tests will be performed for each service on the average of once per year.

Rationale: While established and stable services would require testing less frequently than once per year, new services and services that are modified would require testing throughout the year.

- The average rate per hour to perform EFMV tests is \$50 for company personnel and \$150 for contractors.

Rationale: The rate for company personnel is based on the fully loaded compensation for an entry-level to mid-level manager. The rate for contractors is based on representative billing rates for mid-level consultants.

- The mix of company personnel required for EFMV tests, versus contractors, is roughly 75% to 25% for transaction-based services, 50% each for hybrid services, and 25% to 75% for knowledge-based services.

Rationale: Knowledge-based services are less routine and harder to define than transaction-based services, suggesting the need for outside assistance. Even for primarily transaction-based services, some degree of outside assistance will be required if only to provide the requisite objectivity to the process.

- The list of services provided in Attachment A can be grouped for EFMV test purposes as follows:

Bellcore -- 2 Services = 1 test
 BellSouth Corporation -- 2 Services = 1 test
 BellSouth Business Systems -- 1 Service = 1 test

Rationale: Certain services have similar characteristics allowing the services to be bid upon and evaluated simultaneously.

Cost Drivers

The EFMV proposal would significantly increase costs incurred by BST and its affiliates, both in terms of one-time implementation costs and recurring program administration costs. The majority of the cost increase would be the direct result of the following items:

"One Time" Implementation Costs (Unquantified)

- Accounting procedure revisions
- CAM manual revisions
- Accounting software revisions
- Audit procedure revisions
- Staff training on new procedures and programs

"Recurring" Compliance Costs

- Increased internal regulatory burden (monitoring this new process and justifying the use of FDC vs. EFMV in federal and (9) state jurisdictions - unquantified)
 - Increased complexity of annual audit (unquantified)
 - Operational and administrative costs associated with new EFMV process, including gathering data for alternative provider studies and time to determine EFMV for each service on an on-going basis as well as upon new service introduction
 - Further barriers to doing business among affiliates due to new regulatory restrictions institutionalizing inefficiencies (unquantified).
- Cost of delays in provision of new services to determine EFMV including time-sensitive services such as new product R&D.
 - Cost of inefficiency associated with affiliates choosing not to do business with the regulated entity due to onerous regulatory restrictions that build in costs that eliminate what might be, in the current regulatory environment, the least-cost alternative.

Cost Estimate

Activity Description	Transaction-based		Hybrid service		Knowledge-based	
	Company Hrs	Contractor Hrs	Company Hrs	Contractor Hrs	Company Hrs	Contractor Hrs
<i>Develop/update service specs</i>	70	20	75	75	50	130
<i>Develop/update vendor lists</i>	60	20	65	65	50	90
<i>Issue request for quotes</i>	15	5	15	20	15	40
<i>Review and evaluate quotes</i>	50	13	65	60	50	140
Total Hours	195	58	220	220	165	400
Cost Assumptions						
<i>Rate per hour</i>	\$50	\$150	\$50	\$150	\$50	\$150
<i>Approx. % of hrs req'd - Int v. Ext.</i>	75%	25%	50%	50%	25%	75%
Cost of Labor	9,750	8,700	11,000	33,000	8,250	60,000
Total cost for EFMV test	\$18,450		\$44,000		\$68,250	

Grouping of services results in a total of 255 equivalent EFMV tests:

BSC	220 / 2	=	110 equivalent EFMV tests
Bellcore	225 / 2	=	113 equivalent EFMV tests
BBS	32 / 1	=	32 equivalent EFMV tests
Total		=	255 equivalent EFMV tests

Service Type Distribution # Tests Cost of Test Cost Impact

Transaction-based svc tests	8 %	= 20	@ 20,000	=\$400,000
Hybrid service tests	38 %	= 97	@ 45,000	= \$4,365,000
Knowledge-based svc tests	54 %	= 138	@ 70,000	= \$9,660,000
Estimated Total Cost		255		=\$14,425,000
